

Looking Ahead: Plans for FY11 (and Beyond)

David E. Bernholdt, ORNL

FY11: Developing a Roadmap for the Future of Capability Transfer

- Very small effort (~0.25 FTE) – planning only!
- Roadmap due in June
 - Timely for FY12 planning

Also, a related task in ECT...

- Develop plan for licensing, export control, and distribution of NEAMS software products

And a possible additional FY11 CT task (if \$ materialize)...

- Assist with user requirements gathering and challenge problem refinement for Reactors and SafeSePs IPSCs

What *Could* Capability Transfer Be?

- Draw on experience of programs like ASCI
 - Give users reasons to use new tools (capability, funding, support)
 - Deliver early and often
- Draw on plans of (& collaborate with) CASL
 - Major investment in “Advanced Modeling Applications”
 - Users (technology designers, operators) built into project
- User outreach
 - Supporting Technical Director for NEAMS Integration
 - Act as a focal point for collecting and tracking external requirements
- Evaluation of challenge problems and software
- Basic software support for users, computer centers
- Training on NEAMS products
- ...

Side Meeting at Lunch Time

- Short “birds of a feather” session for potential “NEAMS users”
 - During lunch, after you’ve had a chance to eat
 - Meet in Lobby
