Workshop for Almaty

Trainers

Stefan Behrning

Stefan Behrning studied Construction and Production Engineering at the Saarland University, Germany. Subsequently, in 1996, he started with his doctoral thesis at the Institute for Production Engineering/CAM where he turned Dr.-Ing. in 2000. He then became assistant to the CEO of TUV Saarland e.V. where he was trained and eventually inaugurated as a governmentally licensed technical inspector for pressure equipment and steam boilers. Since 2006 Stefan Behrning works with the TUV Saarland automobil GmbH, a member of TUV Rheinland Group, as the executive Head of the Competence Center for Alternative Fuels mainly addressing alternative propulsion systems based on gases as a fuel. In 2010 he was announced Head of Department "Automotive Approval" as well.
